

HEAD OF ACOUSTICS

Can you help societies thrive in a world we cannot control?

Can you anticipate the unforeseeable, perceive the unexplainable, and plan something unbelievable?

Can you design the unthinkable?

In the Middle East, we are working on some of the world's most iconic and complex projects. We take pride in helping our clients to realise their ambitions by offering our unique, local knowledge whilst leveraging our worldwide expertise. Our people, their expertise and the accountability we hold, for the future of our communities, make us unique.

The key objectives of the role will be to:-

- Lead the Acoustics team consisting of professionals in Dubai and in India
- Have strong commercial skills and manage all of the commercial aspects of the Acoustics team such as P&L, forecasting and fee proposals
- Oversee business development activities for the team and take responsibility for all bids that are submitted
- Provide technical oversight across multiple projects, providing prompt support and expert advice to members of the Acoustics team
- Have strong knowledge of physical acoustics, acoustic parameters and acoustic criteria and use sound modelling software i.e. CadnaA, Soundplan, Odeon, CATT
- Manage a team delivering multiple acoustic projects in a well-organized manner that ensures an efficient and smooth delivery service for our clients

How will you know when you are successful in this role?

- The Acoustics team is being led effectively with individual members feeling supported and empowered to do their jobs to the best of their abilities
- Day to day operation of the Acoustics team is being successfully managed
- Project issues are resolved quickly and effectively
- Clients and others within the business consider me as a trusted advisor in acoustics
- All commercial aspects of the Acoustics team are being managed successfully
- Clients are happy with our deliverables

In order to meet the challenge, you will have the following skills and experience

- A qualified Acoustic Consultant with a degree, diploma or masters in Acoustics
- A member of a Professional Institution
- Have 10+ years technical experience
- Able to work across a range of projects
- Have previous experience working directly for multidisciplinary engineering consultants
- Have experience with the commercial management of a business unit

We are a Great Place to Work© and take pride in attracting, developing and engaging the best professionals in our fields of expertise. We are problem-solvers who evolve, improve, modernise and excel. We know our solutions will shape the communities of tomorrow and help societies thrive sustainably. We embrace change and have an uncompromising determination to achieve excellence.

We are WSP

As one of the world's leading engineering professional services consulting firms, we are dedicated to our local communities and propelled by international brainpower. We are technical experts and strategic advisors including engineers, technicians, scientists, architects, planners, surveyors and environmental specialists, as well as other design, program and construction management professionals. We design lasting solutions in the Property & Buildings, Transportation & Infrastructure, Environment, Industry, Resources (including Mining and Oil & Gas) and Power & Energy sectors as well as project delivery and strategic consulting services. www.wsp.com
