## Acoustic consultants – Manchester

Sandy Brown is one of the world's leading independent acoustic consultancies. With an increasing portfolio of work, we are looking for enthusiastic and capable acoustic consultants at engineer and senior engineer levels to join our team in Manchester.

All candidates must have an applicable degree and a good understanding of building acoustics. Senior engineer candidates would be expected to have knowledge of managing medium-sized projects, working as part of a design team and attending client meetings. They should be able to manage and develop client relationships and provide technical guidance for less experienced members of staff.

Successful candidates will be involved in a variety of work and there are many opportunities for individual development. The work environment is friendly, challenging and stimulating.

We offer a competitive salary package including profit share and pension contributions. To apply, send a cover letter and your CV to Audrey Raymond at [audreyr@sandybrown.com](mailto:audreyr@sandybrown.com).
