Anderson Acoustics

Consultants

We are looking to recruit Consultants with Environmental and/or Airport Noise experience, to join our conscious acoustics consultancy, based in either the heart of Brighton or London Bridge.

As an employee-owned company, all of the team own an equal share of Anderson Acoustics and we are offering the same to those who join us. Being employee-owned means that we directly benefit from our own success, making us more committed, more innovative and more transparent in our working practices.

We are seeking self-motivated, technically capable team players, with an eye for quality and an awareness of our industry, themselves and what goes on around them. We work on some of the largest, most exciting projects in the UK, such as Heathrow Airport's third runway, Thames Tideway Tunnel and HS2.

What we offer: We offer a great and flexible working environment, working with great people, in Brighton or London Bridge depending on your circumstances. There will be a competitive salary based on experience and capability, plus a company pension scheme and bonus.

If you would like to co-own our business with us and work on some of these exciting projects, please send your CV and covering letter via our application link:

CONSULTANT

Acoustics for a better future
Great people • Driven by quality • Technically robust
www.andersonacoustics.co.uk

Anderson Acoustics is an environmental consultancy providing acoustics, noise, vibration, air quality and community engagement services to clients in the construction, planning and aviation sectors. We work on projects large and small, ranging from major infrastructure projects to small projects with local businesses, architects, planners and builders.

Anderson Acoustics is employee-owned, with each employee owning an equal stake in the business through membership of an employee ownership trust. It is our strong belief that a happy, autonomous and self-motivated team of co-owners delivers the highest level of service quality and client value.
