

Graduate / Acoustic Consultant

Mayer Brown is a successful and fast growing Transport Planning, Infrastructure Design & Environmental Consultancy based in Woking with offices nationwide.

For over 25 years the company has developed excellent working relationships with its clients which has helped to form its impressive reputation within the industry. Our people are vital to delivering the best possible service to our clients.

We are currently looking for a Graduate, or Acoustic Consultant to add to our talented and dynamic environmental team in our Woking office (25mins by rail from London Waterloo). The candidate will receive training and mentoring in state-of-the-art monitoring and modelling techniques and will be encouraged to develop their own particular talents in the field of acoustics. At Mayer Brown we also offer the opportunity for cross-disciplinary working, enabling input into a huge variety of local and national projects.

Those applying for an Acoustic Consultant role would ideally have 2-4 years consultancy experience in the acquisition, analysis and modelling of acoustic data against recognised UK standard documents and in the provision of reports and mitigation advice to support planning applications. The ideal candidate should also hold corporate membership of the Institute of Acoustics or have sufficient experience to be looking to apply for such qualification.

Graduates should possess an appropriate engineering related degree or IOA Diploma in Acoustics and Noise Control and an enthusiastic aspiration to develop their professional life as an acoustic consultant.

Candidates should send their CV to Paul Gray at pgray@mayerbrown.co.uk or call on 01483 750508 for an informal chat.
