

Acoustic Consultant

Chesterfield, Derbyshire

Competitive salary and benefits

ACOUSTIC DESIGN TECHNOLOGY
Noise and Vibration Consultants

Acoustic Design Technology are based in Chesterfield, in the north Midlands, on the edge of the Peak District.

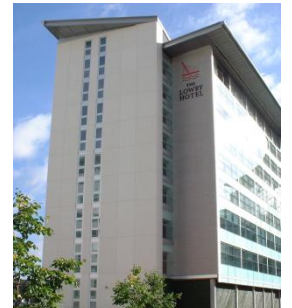

Over more than 25 years we have built up a broad client base, working on projects of all sizes across a range of sectors, with environmental noise and building acoustics at the core of our service provision. Due to an ever expanding workload we are actively seeking to recruit an experienced acoustic consultant.

Job description

As a small consultancy with a large and diverse project portfolio we are looking for someone who is able to lead projects and also take a 'hands on' approach to analysis and report preparation.

Essential requirements:

- a relevant degree and minimum AMIOA status
- good understanding of environmental noise and building acoustics
- effective project management
- excellent written and verbal communication skills
- full driving license

Preferable:

- proficient in the use of Cadna/A, CATT and BASTIAN software
- experience of operating UKAS accreditation or ANC registration scheme
- experience in residential, retail and commercial building sectors
- conversant with the latest editions of BREEAM and relevant British Standards
- familiarity with 01dB, Norsonic and Svantek acoustic testing equipment

Benefits

We offer a competitive salary with performance related bonus, incremental holiday allowance and a pension scheme. As a small consultancy we are able to provide a relaxed, informal, non-corporate working environment. We actively support continuous professional development for our staff and are an equal opportunities employer.

How to apply

Please send your CV to andrewlockwood@acousticdesign.co.uk or call 01246 554841 for more details.

Direct applications only please, no agencies.
